Besondere Merkmale

USB port

Offline firing data recording and evaluation via ROHDEgraph is possible via the USB interface

Evaluating with ROHDEgraph

ROHDEgraph is a piece of software for visualising and archiving firing curves. During firing, the firing data can be automatically written to a USB flash drive by the ROHDE ST series controllers (e.g. ST 310, ST 411, ST 630 or ST 632).

Energy used display

During a fire, the current energy consumption can be read, as well as the total energy consumption of the fire, of the connected kiln, at the end of the fire.

Protection against over-temperature

If the kiln temperature exceeds a certain tolerance range, the kiln switches off.

Lockable keypad

A key lock provides security to prevent set data from being altered.

Error messages

Errors in the process are indicated with codes on the device.
