

Stafford ST 411

Technical data

Type	1 zone control
Range of application	Ceramics, Laboratory, Heat treatment, Fusing
Memory	32 programs
Segments	32 segments

Technical data

Type	1 zone control
Range of application	Ceramics, Laboratory, Heat treatment, Fusing
Memory	32 programs
Segments	32 segments
Switch outputs	1 Schaltausgang
Ext. dimensions (W x D x H)	80 x 165 mm
Weight	405 g

Besondere Merkmale

USB port

Offline firing data recording and evaluation via ROHDEgraph is possible via the USB interface

Evaluating with ROHDEgraph

ROHDEgraph is a piece of software for visualising and archiving firing curves. During firing, the firing data can be automatically written to a USB flash drive by the ROHDE ST series controllers (e.g. ST 310, ST 411, ST 630 or ST 632).

Energy used display

During a fire, the current energy consumption can be read, as well as the total energy consumption of the fire, of the connected kiln, at the end of the fire.

Protection against over-temperature

If the kiln temperature exceeds a certain tolerance range, the kiln switches off.

Lockable keypad

A key lock provides security to prevent set data from being altered.

Error messages

Errors in the process are indicated with codes on the device.
